Recognizing the essential life that exists between animal and humans, the committee % recommends that 1. as the protection of animals is a question of general complex and multifacâ, which has important scientific dimensions, Âfâ © economic, economic and political, the OIE proceeds to a detailed analysis and develop a strategy to incorporate, balance and take into account all these dimensions. 2. The OIE Developing orientations and general principles to constitute a syndic base from which specific recommendations and norms will be elaborated. 3. The IEE establishes a working group on protection of animals to coordinate and supervise the activities of this âgeer, in accordance with what is listed in the next time, and that the working group Assign specific tasks to be carried out by ad-hoc groups. 4. Having consulted the OIE, this work group develops a detailed operating plan for the first twelve months, in order to address the identified priority issues. 5. The work group and their ad hoc groups consult non -governmental organizations (NGOs) with broad international representativeness and resort to all available knowledge and resources, especially in the university âgmibito, in that of research Â³n, of animal production, industry or other relevant sumbs interested. 6. OIE's performance in terms of of animals is divided Follow: animals used in agriculture and aquaculture for production, reproduction or to work, animals of compâÄ±a ± âgeâa, species â ç à € that normally live in freedom and â ç à € œinsâgeâ³litasâ à € à ) included, animals used to carry out research, experiments or activities did discotic, wild animals in freedom, including the subject its task, with or without the use of traps, animals used in sports and recreational activities and in spectally, circuses and zoolâfâ³gicos included, and that, in each group, in addition to the essential considerations related to animal health, The issues related to accommodation, management, transport and sacrifice are discussed (particularly sacrifice in decent conditions, euthanasia and sacrifice for health control purposes). 7. The OIE Dâfâ © priority to the issues related to protection that the necessary resources are available. 8. Within the group of animals used in agriculture and aquaculture, the OIE first occupies transport, sacrifice and sanitary sacrifice in decent conditions and, later, of accommodation and managing. The OIE also considers the aspects related to the protection of animals as problems are raised in the modification of the modification gene and cloning, the selection © ethics and veterinary practice. 9. When occupying zoonosis, the oie dayâ © priority to treat the health aspects of the reduction and policy of the animal population control (animal dogs and cats included). 10. The OIE incorporates into its communicative strategy the main parties interested in the protection of animals, in particular livestock, companies and NGOs. 11. The OIE incorporates in its main functions the considerations to the protection of animals and and The following specific functions: Prepare rules and guidelines that lead to impose good practices of animal protection, provide specialized advice on specific aspects of animal protection to animal OIE, including members, other international organizations, industry and consumers producers, create international databases with information on the protection of animals, such as the different national legislations and political laws, The names of experts in the internationally recognized matter and relevant examples of good protection of animals, identify the necessary components of an effective national infrastructure for the protection of animals that include legislative tools and Juravers as well as the elaboration of self -assessment forms, prepare and disseminate teaching material to raise awareness s to all interlocutors of the OIE, promote the inclusion of the issue of protection of animals in veterinary studies programs, identify the research needs in the field of protection of animals and encourage collaboration fâ³n among the research centers. Resolution "n ° XV adopted by the International Committee of the OIE on May 30, 2002 OIE Mandate for Food Health Security considering that in its 68th a general session, in May of May 2000, the International Committee examined and approved the third strategic plan of the OIE, in its 69 The Director General's work program to execute the recommendations of the Third Strategic Plan for the period 2001-2005. This work program indicated that special attention will be paid to the new ones identified by the strategic plan, the large majority of the members of the OIE.
